

In mod normal, programul isi pune la zi definitiile virusilor automat, in ziua si la ora la care este programat (vezi tutorialul Instalare Norton Antivirus Corporated.pdf in menul Howto)

Desigur, cu conditia sa ffie deschis la momentul respectiv; altfel, dupa o luna te avertiezaza ca definitiile sunt vechi. Ori lansezi punerea la zi deschizand programul , ori o poti face maual. Vezi mai jos. Pare complicat, dar nu este.

Procedeu manual de punere la zi a definitiilor: In navigatorul internet bagi adresa de mai jos:

<http://www.symantec.com/avcenter/download/pages/FR-N95.html>

Se conecteaza la Symantec unde sunt fisierele de definitii puse la zi.

Apare o pagina cu 3 sau 4 tipuri de definitii pentru diverse tipuri de calculatoare si diverse sisteme de exploatare .

Norton AntiVirus for Windows 2000/XP/Vista

As new threats emerge, Symantec immediately builds new protection updates and makes them available for download on a subscription basis. If your subscription has expired, [click here](#).

The Norton AntiVirus engine is common to the Norton AntiVirus, Norton Internet Security, and Norton 360 products. You can update these products using definitions shown below as supporting Norton AntiVirus.

Note: The i32 Intelligent Updater package cannot be used to update Symantec AntiVirus Corporate Edition servers, but can be used to update Corporate Edition clients.

Nom du fichier	Date de mise à jour	Date du fichier	Taille du fichier	MD5 tous
20081010-038-v5i32.exe FTP	Octobre 10, 2008	Octobre 10, 2008	28.54 Mo	D755B8F9D99859B85AC347BACCF9C091

Prend en charge les versions suivantes des logiciels antivirus de Symantec :

- Norton AntiVirus 2009 for Windows XP Home/XP Pro/Vista
- Norton Internet Security 2009 for Windows XP/Home/XP Pro/Vista
- Norton AntiVirus 2008 for Windows XP Home/XP Pro/Vista
- Norton Internet Security 2008 for Windows XP Home/XP Pro/Vista
- Norton 360 version 2.0 for Windows XP/Vista
- Symantec Endpoint Protection 11.0

2 - Dublu click pe fisierul corespunzător versiunii sistemului de exploatare: Windows XP sau Vista; 32 sau 64 bitis

Nom du fichier	Date de mise à jour	Date du fichier	Taille du fichier	MD5 tous
20081010-004-i32.exe FTP	Octobre 10, 2008	Octobre 10, 2008	32.04 Mo	D43D0AC7238693F1C738125D218DB93C

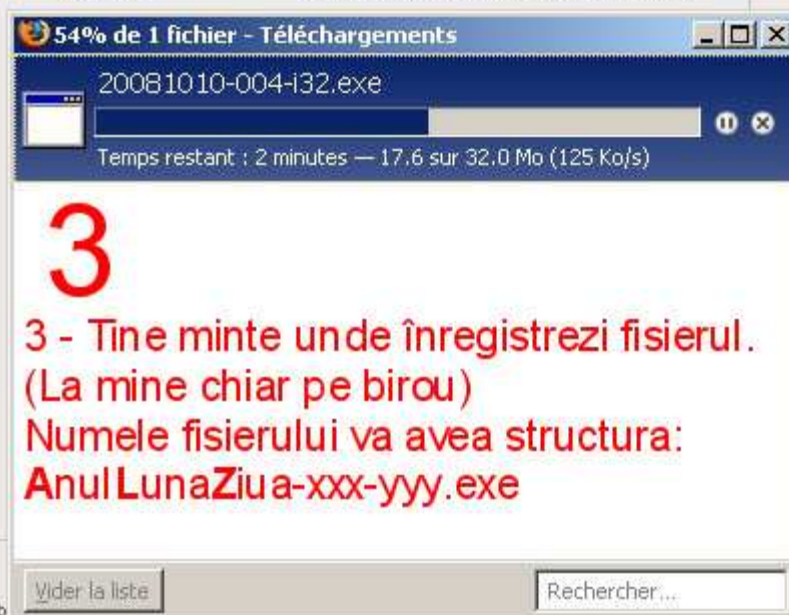

Prend en charge les versions suivantes des logiciels antivirus de Symantec :

- Norton AntiVirus 2003 Professional Edition

- Symantec AntiVirus 10.1 Corporate Edition Client
- Symantec AntiVirus 10.2 Corporate Edition Client
- Symantec Mail Security for Domino v 5.x
- Symantec Mail Security for Microsoft Exchange v 5.x

End of Life for Floppy Disk Definition Sets

Beginning Thursday, August 18th, 2005, US Pacific Time, Symantec will no longer be releasing definitions in this format. The increasing size of virus definitions files and the supplanting of floppy disks with other technologies, we will no longer be releasing definitions in this format. Definitions will continue to be made available through all other current methods.

Nom du fichier	Date de mise à jour	Date du fichier	Taille du fichier	MD5 tous
----------------	---------------------	-----------------	-------------------	------------

Numele acestor fisiere este de tipul : AAAALLZZ-006- si urmeaza cifre si litere care definesc tipul unitate centrala si sistem de exploatare.

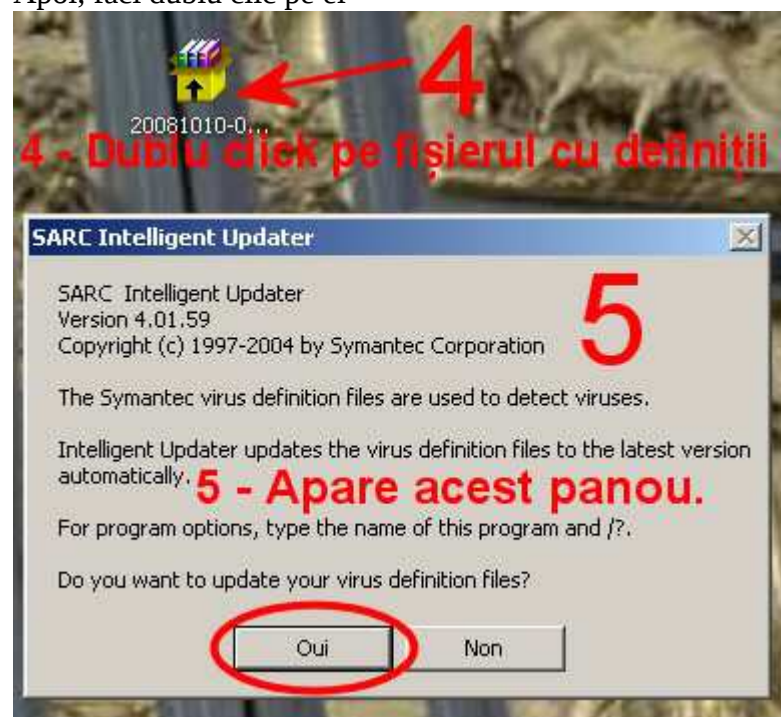

Probabil ca pentru tine acestea ar fi: i32.exe

Daca faci dublu clic pe: 20091028-006-i32.exe fisierul tot mai mare de pe o zi pe alta (acum aproape 150 Mo) se incarca pe calculatorul tau.

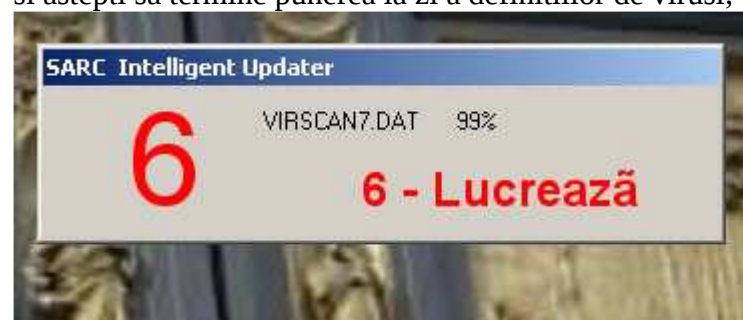

Sunt 2 posibilitati. Sau faci punerea la zi direct de pe serverul Norton, ceea ce presupune o conexiune rapida, sau il **descarci la tine pe calculator** si il executi ulterior.

In al doile caz, fii atent unde se incarca.

Apoi, faci dublu clic pe el

si astepti sa termine punerea la zi a definitiilor de virusi;

dupa care poti sa-l pui la gunoi.
